

Fall 2010 CMMC Seminar Series

"Highlighting UCSF Partners in Cancer Research"

Presented by the Department of Biology and SFSU/UCSF
U56 Partnership to Reduce Cancer Disparities

September 9	Frank McCormick, UCSF	Successes and challenges of targeted cancer therapy
September 16	Andrei Goga, UCSF	Synthetic-lethal strategies for cancer therapy
September 23	Robert Hiatt, UCSF HEI Speaker	Social Determinants of Cancer: How they get under the skin
September 30	Jayanta Debnath, UCSF	Autophagy, cancer cell survival, and mitochondrial homeostasis
October 7	Elad Ziv, UCSF	Genetics of breast cancer risk in Latina women
October 14	Lisa Coussens, UCSF	Inflammation and Cancer
October 21	Michelle Juarez, UCSD MARC/RISE Speaker	Genetics of wound healing: lessons from a fruit fly
October 28	Hassan Lemjabber- Alaoui, UCSF	Role of a novel proteoglycans modifier enzyme in lung cancer
November 4	Kimberly Myers, NCI MARC/RISE Speaker	Biospecimens and how they will shape Personalized Medicine
November 18	George Caughey, UCSF	Immune serine proteases: chameleons of host defense
December 2	Lewis Lanier, UCSF	Natural killer cells provide immunity against viral infection
December 9	Joel Palefsky, UCSF	HPV-related cancers in the HIV-positive host

Thursdays, September 9 - December 9
Seminar: Science 210, 4:00 p.m.

Sponsored by Helen Diller Family/UCSF Cancer Center,
SFSU Biology Department and Health Equity Institute, and
NIH MARC, RISE, and U56 Programs
